Waterfall Questions & Answers:

1. List out the seven main phases of the Waterfall methodology:
   a. Planning
   b. Analysis
   c. Design
   d. Construction/Build
   e. Testing
   f. Implementation/Deployment
   g. Maintenance/Support
2. Within the Waterfall methodology, are you able to revisit phases as time goes on?
   a. Yes, the waterfall methodology does allow teams to move between phases as necessary throughout implementation and maintenance.
3. Which projects are generally best suited for Waterfall?
   a. Non-chaotic, short term projects with a clear end goal
4. Are potential issues identified and addressed as you go when using the waterfall methodology?
   a. No, if your goal is to identify issues as you build out a solution it is best you look at the Agile methodology. Waterfall does not aide itself well to continuous development.
5. Given the nature of Waterfall, is documentation produced throughout the development of a project?
   a. Yes, one of the advantages of the Waterfall methodology is that documentation is generated throughout the process.
